AT&T Hotel & Conference Center, Austin, Texas • May 30–June 1, 2019

Lymphatic Forum 2019

Exploring the Lymphatic Continuum

Organizers: David Zawieja, Texas A&M University;
Jan Kitajewski, University of Illinois at Chicago; Stanley Rockson, Stanford University
Co-Organizer: William Repicci, Lymphatic Education & Research Network (LE&RN)

The **Lymphatic Education and Research Network (LE&RN)** and the **North American Vascular Biology Organization (NAVBO)** are pleased to sponsor the upcoming **Lymphatic Forum 2019, *Exploring the Lymphatic Continuum***, May 30–June 1, 2019 at the AT&T Conference Center, Austin, Texas. Hosted by Texas A&M University and Lymphatic Consortium.

Topics to include:

- Clinical/patient session Clinical Aspects of lymphatic pathologies and patient perspectives Lymphatic development and remodeling
- Biomechanics of lymphatic structure & function
- Lymphatic muscle and lymph flow
- Novel insights on mechanisms of lymph transport
- Inflammation and the lymphatic-immune interface
- Role of Lymphatics in infectious and parasitic diseases
- Mixed vascular (lymphatic-venous) anomalies
- Quantitative analysis of lymphatic structure & function
- Lymph Interstitial Fluid “omic” profiles in health and disease
- Lymphatic tissue engineering, stem cells and nanoparticles

The Forum will also include **Poster Sessions** and a **Young Investigator Session** with other great opportunities for the involvement of young investigators.

Highlights

- Over 30 internationally renowned scientists working in basic and disease-oriented areas of lymphatic and vascular biology
- Short talks from selected abstracts
- Nano-talks
- Poster sessions
- Clinical presentations
- Travel and poster awards for trainees
- Plenary Lecture: Dr. Peter Mortimer, St. George’s, University of London
